OBSERVAÇÕES:

CAMISAS DE ADAPTAÇÃO: Em alguns motores o projeto original não prevê o inserto de camisas reposição para reaproveitamento do bloco, mas diante de uma série de fatores o mercado acaba desenvolvendo alternativas para algumas aplicações.

Produzimos estas alternativas com referências as dimensões que o mercado definiu, apenas elegendo o material adequado para a aplicação.

A Riosulense não assume qualquer responsabilidade por problemas ocorridos de atingimento de galerias durante o processo de usinagem do cilindro, isto em função de possíveis variáveis do bloco com suas galerias durante o processo de fundição.

AS BUCHAS BRUTAS CENTRIFUGADAS estão a disposição para adaptação/recuperação de camisas em blocos nas condições onde não se encontra no mercado camisas específicas, atendendo assim a necessidade de cada aplicador.

As Buchas Brutas Centrifugadas estão sujeitas a falhas superficiais resultantes de processo de fundição, diante desta situação, recomendamos considerar a eliminação no processo de usinagem em 5mm no diâmetro externo e 6mm no diâmetro interno.

A Riosulense não se responsabiliza pelos custos adicionados de processo de usinagem diante de eventual falha apresentada.
